

Osnovne informacije

Ovaj dokument opisuje Šmit Electronic REST API i njegove izložene resurse. API je namijenjen programskoj interakciji sa Šmit Electronic web dućanom. Kako se REST API bazira na otvorenim standardima, moguće je koristiti praktički sve programske jezike za pristup API-ju. Za korištenje Šmit Electronic REST API-ja potrebno je obaviti HTTP zahtjev i obraditi odgovor. U trenutnoj verziji API-ja moguće je samo dohvaćati podatke, te se koristi samo HTTP GET metoda za dohvat podataka. Podržani formati odgovora su XML i JSON. Preporuča se korištenje JSON formata.

Korištenje servisa

Autentifikacija i autorizacija

Svaki zahtjev mora koristiti Basic Authentication.

Zahtjev će biti autoriziran prema ovlastima definiranim na Šmit Electronic web dućanu (<http://www.smit-electronic.hr>). Što znači da ćete u Basic Authentication koristiti isto korisničko ime i lozinku kao za prijavu na Šmit Electronic web dućan.

Preporuke o načinu korištenja

Kako bi se povećala dostupnost sustava koji koriste Šmit Electronic REST API, kao i njihove performanse, preporuka je da sustavi koji su klijenti API-ja podatke iz API-ja koji su im potrebni za rad dohvaćaju povremeno i spremaju lokalno u klijentski sustav. Krajnji korisnici tih sustava trebali bi koristiti te lokalne podatke tako da ne ovise o Šmit Electronic REST API-ju (dostupnost API-ja, performanse, ...).

Servisi
